Duro-Last[®] Roofing, Inc. Reaches Safety Milestone

Saginaw, Michigan – July 28, 2009 – Duro-Last[®] Roofing, Inc., the world's largest manufacturer of prefabricated roofing systems, is proud to announce that employees at its Grants Pass, Oregon, facility have successfully attained over 176,000 OSHA (Occupational Safety & Health Administration) recordable free work hours as of the end of June 2009. This is equivalent to more than 83 person-work-years without an injury requiring a physician's treatment. The OSHA recordable rate is representative of the number of medical visits requiring a physician's attention for every 100 employees working a normal work week. This record stretches back to September of 2007 and includes an injury-free 2008 calendar year.

"We are proud of all the employees that have performed their jobs in a safe, efficient, and smart manner under any condition," said Michael Matthews, Corporate Safety Director. "This achievement shows how everyone is dedicated to working together to provide worker safety."

The Oregon production facility attained SHARP (Safety and Health Achievement Recognition Program) status in 2001 from Oregon OSHA and graduated from the SHARP program in 2006. SHARP recognizes employers who operate an exemplary safety and health management system. The facility's OSHA recordable free record is setting the pace for all Duro-Last production facilities' safety performance.

The production personnel celebrated this accomplishment July 2nd with a luncheon with Duro-Last President, Tom Hollingsworth, and National Production Manager, Steve Przybylski, from the world headquarters in Saginaw, Michigan.

*With corporate headquarters and a manufacturing facility in Saginaw, Michigan as well as other locations in Grants Pass, Oregon; Jackson, Mississippi; and Sigourney, Iowa, Duro-Last® Roofing, Inc. is the manufacturer of the “World’s Best Roof”®. Since 1978, Duro-Last has produced a custom-fabricated, thermoplastic single-ply roofing system that is ideal for any flat or low-sloped commercial or industrial building. Energy-efficient and extremely durable, the Duro-Last roofing system is also leak-proof, virtually maintenance-free and resistant to chemicals, fire, punctures, and high winds. In addition to the Duro-Last roofing system, the company’s brands include the Duro-Last Cool Zone®, the Duro-Shield metal retrofit, and the Duro-Last Designer Series roofing systems.
